Profile Summary

Experienced Full-Stack Developer with a strong focus on scalable, high-performance web applications and deep expertise in backend development, system architecture, and database management. I have successfully delivered and led projects in fast-paced, demanding environments, ensuring efficiency, security, and seamless system integration.

Bridging the gap between frontend and backend to create optimal user experiences I'm proficient in JavaScript, TypeScript, Next.js, React, and Node.js, I specialize in RESTful APIs, microservices, and third-party integrations. Extending to database systems like SQL (PostgreSQL) and NoSQL (MongoDB) databases, I optimize query performance, ensure data integrity, and build reliable, scalable database systems.

A collaborative and detail-oriented professional, I excel in cross-functional teams, effectively communicating technical concepts through clear documentation, mentorship, and proactive problem-solving. Passionate about continuous learning and innovation, I stay ahead of industry trends to build future-proof digital solutions that enhance efficiency, drive business value and deliver high-quality digital products.

Skills

Typescript	REST API
JavaScript	Redis
NodeJS/Express JS	RabbitMQ
Adapter Design Pattern	NestJS
SQL Database (Postgres)	MicroServices
NoSQL (MongoDB)	Service-Oriented Architecture(SOA)
Mongoose	Sanity CMS
Prisma	Deno
Docker	Postman
Caching	Git and Github
React	Jira
Nextjs	Agile Methodology and Sprint Planning
Tailwind Css	Strong problem-solving and analytical

Experience

MAY 2024- PRESENT

Full-Stack Developer | Sayf Network

- Led the full-stack development of an admin dashboard, improving user efficiency by 35% through an intuitive UI and seamless backend integration
- Designed and implemented the system using Next.js, MongoDB, Mongoose, and Tailwind CSS, ensuring scalability and performance optimization.
- Enhanced data management and security, leading to a 25% improvement in query performance and ensuring data integrity and reliability.
- Established a direct communication process with stakeholders, reducing feedback cycles by 50%, leading to a faster and more accurate development process.

NOV 2024 – PRESENT

Lead Software Developer | Nextage Digital Solutions

- Led the development of multiple applications, improving development speed by 40% through efficient code structuring and process automation.
- Collaborated with cross-functional teams, effectively communicating technical requirements and solutions, resulting in 20% faster project delivery times.
- Designed and deployed scalable, high-performance systems using Next.js, Sanity, TypeScript, Tailwind, ensuring 99.9% uptime and seamless data flow.

DECEMBER 2025 - PRESENT

Frontend Developer | Rawaaq School Management System

- Developed a responsive, feature-rich frontend using Next.js, React, TypeScript, and Tailwind CSS, improving load times by 30% and ensuring cross-device compatibility.
- Effectively collaborated with a senior developer and other contributors via GitHub, reducing merge conflicts and improving code review efficiency by 50%.

JANUARY 2025- PRESENT

Backend Developer | Microservice Project

- Engineered a scalable microservice architecture using Node.js, Express, MongoDB, RabbitMQ, and Redis, ensuring 99.8% uptime and real-time processing.
- Designed and optimized the backend infrastructure, improving API response times by 45% and handling a 30% increase in concurrent users.
- Implemented robust authentication and security protocols, reducing potential vulnerabilities by 50% and ensuring data protection.

Projects

NOVEMBER 2024 - PRESENT

Backend Microservice Project *(Independent Project)*

- A scalable, high-performance media microservice project, focusing on real-time interactions and message queuing.
- **Tech Stack:** Node.js, TypeScript, RabbitMQ, PostgreSQL, Prisma, Docker, Prometheus, Grafana

NOVEMBER 2024 - JANUARY 2025

Distinct Patterns Fashion Store

- A fully functional e-commerce platform for seamless online shopping experiences.
- **Tech Stack:** Next.js, TypeScript, Sanity.io, Tailwind CSS, ShadCN, PayPal API, React

DECEMBER 2024 - PRESENT

Rawaaq – School Management System

- A comprehensive school management system to streamline student, teacher, and administrative workflows.
- **Tech Stack:** Next.js, TypeScript, React.js, Tailwind CSS, ShadCN.

Education

Golden Green Comprehensive High School, Ayetoro

Certifications & Achievements

IBM Certified Developer – *Developing Cloud Applications with React and Node.js* (May 2023)

FreeCodeCamp Certification – *Front-End Development Libraries* (July 6, 2023)

FreeCodeCamp Certification – *Responsive Web Design* (May 8, 2023)

3 GitHub Achievements & Up to 500 contributions in the Last year
